Protecting His Witch Zoe Forward 2014-10-27 The last thing he wanted was to fall for a witch... Veterinarian Kat Ramsey hasn't a clue that she's a witch. Sure, she can read minds, and there's the whole "dimension-hopping" issue that she can't quite control, but Kat is determined to keep things normal. That is, until she accidentally hops into the Otherworld and runs into Matthew Ryan?the seriously hot one-night stand from years ago who shoved her out of his dorm. Naked. And there's the tiny matter of the curse she gave him. May you never find satisfaction with another woman. Billionaire and former druid Matthew Ryan hasn't forgotten the curse, or the witch who gave it to him. Kat's unexpected return means the curse will finally be broken. Unfortunately, his libido has other ideas?like how to get her back into his bed one last time. But far more worrying is his suspicion that Kat is the seventh Pleiades witch. Because while he's turned his back on his druidic ways, he's still bound to protect the woman who made his life hell. Each book in the Keepers of the Veil series is STANDALONE: * Protecting His Witch * His Witch to Keep * Playing the Witch's Game

For Better or For Worse? Collaborative Couples in the Sciences Annette Lykkes 2012-06-05 In this volume, a distinguished set of international scholars examine the nature of collaboration between life partners in the sciences, with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice. Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit, the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced, heterosexual and homosexual, aristocratic and working-class and politically right and left. The contributors analyze cases shaped by their particular geographical locations, ranging from retreat settings like the English countryside and Woods Hole, Massachusetts, to university laboratories and urban centers in Berlin, Stockholm, Geneva and London. The volume demonstrates how the terms and meanings of collaboration, variably shaped by disciplinary imperatives, cultural mores, and the agency of the collaborators themselves, illuminate critical intellectual and institutional developments in the modern sciences.

When Worlds Collide in Manufacturing Operations Charlie Gifford 2011 Book 2.0 is the second collection of public methodology white papers from the ISA-95/MESA Best Practices Working Group. The methodology white papers focus on applying the ISA-95 standards to accelerate the adoption of Manufacturing Operations Management (MOM) systems and the Manufacturing 2.0 Architecture (Mfg 2.0) approach. There is a focus on how to build a Manufacturing Transformation Strategy where manufacturers discover that using MOM systems combined with continuous improvement methods dramatically accelerate transformation and time-to-benefit. The business benefits from optimizing operations are realized by structuring plant workflows in ISA-95 models as a common definition foundation for Mfg 2.0 architecture. This enforces effective data structure, definition, integrity and governance across manufacturing applications. Book 2.0 explains how to implement ISA-95 workflow applications in Mfg 2.0 to execute operations tasks through the MOM and physical process levels while coordinating them to streamline plant operations and align those operations with ever-changing supply chain processes.

The Modern Library Writer's Workshop Stephen Koch 2009-05-14 "Make [your] characters want something right away--even if it's only a glass of water. Characters paralyzed by the meaninglessness of modern life still have to drink water from time to time." --Kurt Vonnegut "'The cat sat on the mat' is not the beginning of a story, but 'the cat sat on the dog's mat' is." --John Le Carré Nothing is more inspiring for a beginning writer than listening to masters of the craft talk about the writing life. But if you can't get Vladimir Nabokov, Virginia Woolf, and Gabriel García Márquez together at the Algonquin, The Modern Library Writer's Workshop gives you the next best thing. Stephen Koch, former chair of Columbia University's graduate creative writing program, presents a unique guide to the craft of fiction. Along with his own lucid observations and commonsense techniques, he weaves together wisdom, advice, and inspiring commentary from some of our greatest writers. Taking you from the moment of inspiration (keep a notebook with you at all times), to writing a first draft (do it quickly! you can always revise later), to figuring out a plot (plot always serves the story, not vice versa), Koch is a benevolent mentor, glad to dispense sound advice when you need it most. The Modern Library Writer's Workshop belongs on every writer's shelf, to be picked up and pored over for those moments when the muse needs a little help finding her way.

Essays in Phenomenology Maurice Natanson 2013-12-19 Fifteen years ago, Dorion Cairns concluded an article on phenomenology with a cautious appraisal of its influence in America. "Thus far," he wrote, "it continues to be an exotic." The situation today has changed: translations of the writings of Husserl, Heidegger, Marcel, Sartre, and Merleau-Ponty have appeared, and commentaries on these and related thinkers are not uncommon. Moreover, discussion of phenomenological problems is increasingly becoming part of the American (if not the British) philosophical scene. Phenomenology is in danger of domestication! Signs of its accommodation include a willingness to pay tribute to Husserl's Logical Investigations by those who find relatively little to interest them in his later work, a location of what are taken to be common themes and underlying convergences of emphasis in Continental phenomenology and Anglo-American philosophy of the more nearly Wittgensteinian and Austinian varieties, and a growing impatience (shared by some phenomenologists) with expositions, explications, and interpretations of Husserl's work at the expense of original applications of phenomenology. Most bluntly put, the attitude is: Don't talk about it; do it! It would seem that we have arrived at a point where introductions to phenomenology are of doubtful value, if not superfluous. The present collection of essays is based on different assumptions and points to an alternative conception of the role of both methodology and originality in phenomenological work

Developing Intelligent Agent Systems Lin Padgham 2005-06-24 Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool - software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book. Electronic resources including the Prometheus Design Tool (PDT), can be found at: <http://www.cs.rmit.edu.au/agents/prometheus> This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

With God in the Crucible Peter Storey 2010-09-01 Often the church is accused of being so embedded in the culture that effective prophecy leveled at the culture is impossible. But this book illustrates that there was a time and a place where the church community was faithful to its mission as the body of Christ, as church leaders led, people lifted high the cross, and they marched into the uncertainty that still prevails. Here is a time and place where the call to risky discipleship was answered not with whimpers, whines, and excuses, but with the power of faithful Christians living out their call. This book illustrates what it can mean to faithfully answer the call to discipleship and God's service. Many people wonder if they would be able to stand up for their faith if it meant great personal sacrifice or the sacrifice of people they love. They wonder what they would risk for their faith, if anything. In the United States where cost/benefit analysis is a popular way to assess risk, many Christians wonder if they might not have to stand alone, because too many see the risks as too costly. As suggested by the title, this book draws upon a collection of sermons and addresses given by Peter Storey in a variety of contexts between 1966 and 1993. The original audiences ranged from the all-white Central Methodist Church in Johannesburg, to the South African Council of Churches, to the nation of South Africa, and to the world. All of these sermons and addresses are directly related to specific historical events: security police confrontations, beatings, and tear-gassings in churches around the country of South Africa; an imposed State of Emergency; the murder of 14-year-old Stompie Sepie by Winnie Mandela's thugs; and the violent jockeying for power between Mandela's African National Congress, Chief Mangosutho Buthe's Inkatha Movement, and F. W. de Klerk's regime. The book offers the full perspective of what it means to speak truth, empower people to stand for the truth, and to pastor souls during times when living truth seems almost impossible. Key Features: 1.

Foreword by Desmond Tutu 2. 15 chapters, each including a brief description of the original context, the sermon and its connection with the present, and a prayer 3. Epilogue by Will Willimon

Readings in Zoosemiotics Timo Maran 2012-01-01 The book is the first annotated reader to focus specifically on the discipline of zoosemiotics. Zoosemiotics can be defined today as the study of signification, communication and representation within and across animal species. The name for the field was proposed in 1963 by the American semiotician Thomas A. Sebeok. He also established the framework for the paradigm by finding and tightening connections to predecessors, describing terminology, developing methodology and setting directions for possible future studies. The volume includes a wide selection of original texts accompanied by editorial introductions. An extensive opening introduction discusses the place of zoosemiotics among other sciences as well as its inner dimensions; the understanding of the concept of communication in zoosemiotics, the heritage of biologist Jakob v. Uexküll; contemporary developments in zoosemiotics and other issues. Chapter introductions discuss the background of the authors and selected texts, as well as other relevant texts. The selected texts cover a wide range of topics, such as semiotic constitution of nature, cognitive capabilities of animals, typology of animal expression and many other issues. The roots of zoosemiotics can be traced back to the works of David Hume and John Locke. Great emphasis is placed on the heritage of Thomas A. Sebeok, and a total of four of his essays are included. The Reader also includes influential studies in animal communication (honey bee dance language, vervet monkey alarm calls) as well as theory elaborations by Gregory Bateson and others. The reader concludes with a section dedicated to contemporary research. Readings in Zoosemiotics is intended as a primary source of information about zoosemiotics, and also provides additional readings for students of cognitive ethology and animal communication studies.

Unworthy Anneli Rufus 2014-05-15 "Self-loathing is a dark land studded with booby traps. Fumbling through its dark underbrush, we cannot see what our trouble actually is: that we are mistaken about ourselves. That we were told lies long ago that we, in love and loyalty and fear, believed. Will we believe ourselves to death?" --from Unworthy As someone who has struggled with low self-esteem her entire life, Anneli Rufus knows only too well how the world looks through the eyes of those who are not comfortable in their own skin. In Unworthy, Rufus boldly explores how a lack of faith in ourselves can turn us into our own worst enemies. Drawing on extensive research, enlightening interviews, and her own poignant experiences, Rufus considers the question: What personal, societal, biological, and historical factors coalesced to spark this secret epidemic, and what can be done to put a stop to it? She reveals the underlying sources of low self-esteem and leads us through strategies for positive change.
