International Experience in Developing the Financial Resources of Universities

Abdulrahman Obaid Al-Youbi 2021-10-04 This open access book aims to present the experiences and visions of several world university leaders, providing strategies and methods used to find various income sources for their institutions. The expansion of a university system requires a corresponding increase in funding. Consequently, university administrators all over the world are in a constant search for additional funds. If higher-level institutions are expected to deliver high-quality education and research, their sustainable funding is crucial to the development of the countries they serve. While governmental sources are a major part of the funding of most universities, economic downturns as in the case of the COVID-19 crisis may reduce governmental contributions in this and cause administrators to look for various alternative sources to help them compete in a global setting. This book offers valuable information and guidance to university leaders and administrators worldwide especially at a time when university budgets are under stress due to the COVID-19 pandemic with its dire financial and economic consequences.

The College Dropout Scandal David Kirp 2019-07-03 Higher education today faces a host of challenges, from quality to cost. But too little attention gets paid to a startling fact: four out of ten students -- that's more than ten percent of the entire population -- who start college drop out. The situation is particularly dire for black and Latino students, those from poor families, and those who are first in their families to attend college. In *The College Dropout Scandal*, David Kirp outlines the scale of the problem and shows that it's fixable -- we already have the tools to boost graduation rates and shrink the achievement gap. Many college administrators know what has to be done, but many of them are not doing the job -- the dropout rate hasn't decreased for decades. It's not elite schools like Harvard or Williams who are setting the example, but places like City University of New York and Long Beach State, which are doing the hard work to assure that more students have a better education and a diploma. As in his *New York Times* columns, Kirp relies on vivid, on-the-ground reporting, conversations with campus leaders, faculty and students, as well as cogent overviews of cutting-edge research to identify the institutional reforms--like using big data to quickly identify at-risk students and get them the support they need -- and the behavioral

strategies -- from nudges to mindset changes - -that have been proven to work. Through engaging stories that shine a light on an underappreciated problem in colleges today, David Kirp's hopeful book will prompt colleges to make student success a top priority and push more students across the finish line, keeping their hopes of achieving the American Dream alive.

Ladder Andrew Bernard 2021-02-28 Foreword by Colonel Dame Kelly Holmes. Regardless of one's plans for the future, many people's careers are founded on a series of chance encounters, experiences and serendipity. School, college, university, jobs, family, sports, hobbies, friends, relationships - these are all fertile grounds for career-related conversations and explorations. What if we teachers, guides, mentors, parents and peers started to notice these seemingly unconnected happenings and, indeed, started to engineer and encourage them to happen? Using the mantra 'every adult is a careers teacher', *The Ladder* will inspire teachers to explicitly link their subject area to students' futures, both in school and outside its walls, and support them in doing so. Bernie draws upon his 30-year career in education and business development to bring clarity, focus and ideas to educators as to how they can best start students on their own ladders to success. Ultimately, in writing this book, Bernie's aim is to bring young people's futures to life with some personal skills reflection and forward planning designed to help them as they embark on their fulfilling futures - regardless of their upbringing, academic achievements or ethnic background.

The Meritocracy Trap Daniel Markovits 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal - that social and economic rewards should follow achievement rather than breeding - reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if, both up and down the social

ladder, meritocracy is a sham? Today, meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy, and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that, if we understand that meritocratic inequality produces near-universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward, towards a new world that might once again afford dignity and prosperity to the American people.

Life for the Academic in the Neoliberal University Alpesh Maisuria 2019-10-08 *Life for the Academic in the Neoliberal University* investigates the impact of neoliberalism on academics in today's universities. Considering the experiences of early career researchers as well as more experienced academics, it outlines the changing nature of working life in the university precipitated by the reality of de-professionalisation, worsening conditions of employment, and general precarious existence. The book traces the dramatic shift in the role and function of universities and academics over the last forty years. It considers how capitalist neoliberalism drives universities to operate like businesses in a cut-throat financialised education market place. Uniquely the book then provides a possible alternative in the form of the National Education Service (NES) and what this alternative system could look like. Thought-provoking and

relevant, this book will be of use to postgraduate students as well as new, emerging, and established academics interested in the current state of higher education, academic life, and possibilities for the future.

Making Education Work for the Poor William Elliott 2018-07-03 Making Education Work for the Poor identifies wealth inequality as the gravest threat to the endangered American Dream. Though studies have clearly illustrated that education is the primary path to upward mobility, today, educational outcomes are more directly determined by wealth than innate ability and exerted effort. This accounting directly contradicts Americans' understanding of the promise the American Dream is supposed to offer: a level playing field and a path towards a more profitable future. In this book, the authors share their own stories of their journeys through the unequal U.S. education system. One started from relative privilege and had her way to prosperity paved and her individual efforts augmented by institutional and structural support. The other grew up in poverty and had to fight against currents to complete higher education, only to find his ability to profit from that degree compromised by student debt. To directly counter wealth inequality and make education the 'great equalizer' that Americans believe it to be, this book calls for a revolution in financial aid policy, from debt dependence to asset empowerment. The book examines the evidence base supporting Children's Savings Accounts, including CSAs' demonstrated potential to improve children's outcomes all along the 'opportunity pipeline': early education, school achievement, college access and completion, and post-college financial health. It then outlines a policy that builds on CSAs to incorporate a sizable, progressive wealth transfer. This new policy, Opportunity Investment Accounts, is framed as the cornerstone of the wealth-building agenda the nation needs in order to salvage the American Dream. Written by leading CSA researchers, the book includes overviews of the major children's savings legislation proposed in Congress and the key features of prominent CSA programs in operation around the country today, as well

as new qualitative and quantitative CSA research. The book ultimately presents a critical development of the theories that, together, explain how universal, progressive, asset-based education financing could make education work equitably for all American children.

American Hate Arjun Singh Sethi 2018-08-07 "Amid the ugly realities of contemporary America, American Hate affirms our courage and inspiration, opening a roadmap to reconciliation by means of the victims' own words." —NPR Books "The collection offers possible solutions for how people, on their own or working with others, can confront hate." —San Francisco Chronicle A San Francisco Chronicle Books Pick One of Bitch Media's "13 Books Feminists Should Read in August" One of Paste Magazine's "The 10 Best Books of August 2018" A moving and timely collection of testimonials from people impacted by hate before and after the 2016 presidential election In American Hate: Survivors Speak Out, Arjun Singh Sethi, a community activist and civil rights lawyer, chronicles the stories of individuals affected by hate. In a series of powerful, unfiltered testimonials, survivors tell their stories in their own words and describe how the bigoted rhetoric and policies of the Trump administration have intensified bullying, discrimination, and even violence toward them and their communities. We hear from the family of Khalid Jabara, who was murdered in Tulsa, Oklahoma, in August 2016 by a man who had previously harassed and threatened them because they were Arab American. Sethi brings us the story of Jeanette Vizguerra, an undocumented mother of four who took sanctuary in a Denver church in February 2017 because she feared deportation under Trump's cruel immigration enforcement regime. Sethi interviews Taylor Dumpson, a young black woman who was elected student body president at American University only to find nooses hanging across campus on her first day in office. We hear from many more people impacted by the Trump administration, including Native, black, Arab, Latinx, South Asian, Southeast Asian, Muslim, Jewish, Sikh, undocumented, refugee,

transgender, queer, and people with disabilities. A necessary book for these times, *American Hate* explores this tragic moment in U.S. history by empowering survivors whose voices white supremacists and right-wing populist movements have tried to silence. It also provides ideas and practices for resistance that all of us can take to combat hate both now and in the future.

The Attack on Higher Education Ronald G. Musto 2021-11-11 American higher education is under attack today as never before. A growing right-wing narrative portrays academia as corrupt, irrelevant, costly, and dangerous to both students and the nation. Budget cuts, attacks on liberal arts and humanities disciplines, faculty layoffs and retrenchments, technology displacements, corporatization, and campus closings have accelerated over the past decade. In this timely volume, Ronald Musto draws on historical precedent - Henry VIII's dissolution of British monasteries in the 1530s - for his study of the current threats to American higher education. He shows how a triad of forces - authority, separateness, and innovation - enabled monasteries to succeed, and then suddenly and unexpectedly to fail. Musto applies this analogy to contemporary academia. Despite higher education's vital centrality to American culture and economy, a powerful, anti-liberal narrative is severely damaging its reputation among parents, voters, and politicians. Musto offers a comprehensive account of this narrative from the mid-twentieth century to the present, as well as a new set of arguments to counter criticisms and rebuild the image of higher education.

Universities as Agencies Tom Christensen 2018-08-04 This book discusses how modern universities increasingly use reputation management in relation to internal and external challenges. Universities are increasingly characterized by social embeddedness, relating to many external stakeholders and international markets of students, researchers and

research projects. This implies global pressure to standardize, formalize and rationalize their internal organization. The book uses data from China, Norway and US to show how reputation symbols are used and balanced, based on their web pages. Further, it uses extensive data from US universities to show how their internal organization structure is developing over time, related to three types of units/positions - development, diversity and legal offices and roles.

Acute Nursing Care Helen Dutton 2020-11-30 Delays in recognising deterioration, or inappropriate management of people in acute care

settings can result in late treatment, avoidable admissions to intensive care units and, in some instances, unnecessary deaths. As the role of the nurse in healthcare settings continues to change and evolve, today's nursing and other healthcare students need to be equipped with the fundamental skills to recognise and manage deterioration in the patient in a competent and confident manner, appreciating the complexities of caring for those who are acutely unwell as you learn to become practitioners of the future. Using a body systems approach, and fully updated in light of new NEWS2 and NMC future nurse standards, as well as acknowledging the challenges faced by people with delirium in acute care settings, the second edition of this book provides a comprehensive overview of the essential issues in this important subject. Topics covered include recognition and identification of physiological and mental deterioration in adults; identification of disordered physiology that may lead to a medical emergency linked to deterioration of normal function; relevant anatomy and physiology; pathophysiological changes and actions that need to be taken; immediate recognition and response; investigations, diagnosis and management issues; and teaching and preventative strategies. Including case studies and test yourself questions, this book is an essential tool for student nurses who are required to undertake acute care experiences and are assessed in theory and practice.
