Hidden Path Elena Fortún 2020-10-30 Set in early twentieth-century Spain, Hidden Path is a lyrical coming-of-age novel told from the perspective of a woman painter who struggles to find her way with art and with the women she loved. The novel is narrated in the first-person, following María Luisa as she reflects on her life from the turn of the twentieth century through the outset of the Second Spanish Republic (1931-1939). She recalls growing from an imaginative tomboy into a docile wife and mother before claiming her independence as a portrait painter in Madrid’s bohemian and queer circles. Along the way, she introduces us to a lively cast of characters who both hinder and encourage her efforts to blaze her own path. The poetic and sensuous language of María Luisa’s private reveries comingles with agile dialogue as the protagonist leads us through her life. Best known in Spain as a writer of children’s literature, Elena Fortún left this manuscript unpublished at the time of her death in 1952, as its semi-autobiographical content risked provoking homophobic backlash under the dictatorship of Francisco Franco. The first Spanish edition appeared in 2016 and was hailed as Fortún’s adult masterpiece, a previously unknown complement to her children’s saga Celia and Her World. This edition, with Jeffrey Zamoszny’s sensitive and nuanced translation, marks the novel’s first time appearing in any language aside from Spanish; it is also the first of Fortún’s works to appear in English. With an insightful foreword by scholar Nuria Capdevila-Arquelles, this volume will be an influential contribution to women’s studies, LGBT histories, and Spanish literature and culture.

Quantum Physics for Poets Leon M. Lederman The Times Literary Supplement called their previous book, Symmetry and the Beautiful Universe: [A] tour de force of physics made simple.Quantum theory is the bedrock of contemporary physics and the basis of understanding matter in its tiniest dimensions and the vast universe as a whole. But for many, the theory remains an impenetrable enigma.Nobel Prize laureate Leon M. Lederman and Fermi lab theoretical physicist Christopher T. Hill seek to remedy this situation by both drawing on their scientific expertise and their talent for communicating science to the general reader. In this lucid, informative book, designed for the curious, they make the seemingly daunting subject of quantum physics accessible, appealing, and exciting.Their story is partly historical, covering the many Eureka moments when great scientists-Max Planck, Albert Einstein, Niels Bohr, Werner Heisenberg, Erwin Schrödinger, and others-struggled to come to grips with the bizarre realities that quantum research revealed. Although their findings were indisputably proven in experiments, they were so strange and counterintuitive that Einstein refused to accept quantum theory, despite its great success.The authors explain the many strange and even eerie aspects of quantum reality at the subatomic level, from particles that can be many places simultaneously and sometimes act more like waves, to the effect that a human can have on their movements by just observing them!Finally, Drs. Lederman and Hill delve into quantum physics’ latest and perhaps most breathtaking offshoots-field theory and string theory. The intricacies and ramifications of these two theories will give the reader much to ponder. In addition, the authors describe the diverse applications of quantum theory in its almost countless forms of modern technology throughout the world.Using eloquent analogies and illustrative examples, Quantum Physics for Poets render even the most profound reaches of quantum theory understandable and something for us all to savor.Leon M. Lederman, Nobel Laureate (Batavia, IL), is Resident Scholar at the Illinois Mathematics and Science Academy, Director Emeritus of Fermi National Accelerator Laboratory, Pritzker Professor of Science at the Illinois Institute of Technology, the author of the highly acclaimed The God Particle, the editor of Portraits of Great American Scientists, and a contributor to Science Literacy for the Twenty-First Century. Dr. Lederman and coauthor Christopher T. Hill are also the coauthors of Symmetry and the Beautiful Universe.Christopher T. Hill, PhD (Batavia, IL), is chairman of the Department of Theoretical Physics and a theoretical physicist (Scientist III) at Fermi National Accelerator Laboratory.

Peasant Women and Politics in Fascist Italy Perry Willson 2014-02-04 Peasant women were the largest female occupational group in Italy between the wars. They led lives characterised by great poverty and heavy workloads, but Fascist propaganda extolled them as the mothers of the nation and the guardians of the rural worlds, the most praiseworthy of Italian women. This study is the first published history of the Massaie Rurali, the Fascist Party’s section for peasant women, which, with three million members by 1943, became one of the largest of the regime’s mass mobilizing organizations. The section played a key role in such core fascist campaigns as nation-building and ruralization. Perry Willson draws on a wide range of archival and contemporary press sources to investigate the nature of the Massaie Rurali and the dynamics of class and gender that lay at its heart. She explores the organization’s political message, its propaganda and the reasons why so many women joined it.

Doctors and Healers Tobie Nathan 2018-08-08 We think we know what healers do: they build on patients’ irrational beliefs and treat them in a ‘symbolic’ way. If they get results, it’s thanks to their capacity to listen, rather than any influence on a clinical level. At the same time, we also think we know what modern medicine is: a highly technical and rational process, but one that scarcely listens to patients at all. In this book, ethnopsychiatrist Tobie Nathan and philosopher Isabelle Stengers argue that this commonly posed opposition between traditional and modern medicine is misleading. They show instead that healers are interesting precisely because they don’t listen to patients, using techniques of ‘divination’ rather than ‘diagnosis’. Healers construct genuine therapeutic strategies by identifying the origins of symptoms in external forces, outside of the mind of the sufferer. Modern medicine, for its part, is characterized by empiricism rather than rationality. What appears to be the pursuit of rationality is ultimately only a means to dismiss and exclude other forms of treatment. Blurring the distinctions between traditional and modern practices and drawing on perspectives from across the globe, this ethnopsychiatric manifesto encourages us to think in radically new ways about illness, challenging accepted notions on the relationship between sufferer and symptom.

La Rondine Giacomo Puccini 1987 Puccini's non-operatic songs, Arie da camera e da chiesa for voice and piano, have never before been collected--many until now have never been published. They cover the entire span of the composer's life: the earliest was written when Puccini was in his teens, the latest when the composer was in his sixties. Working from musical manuscripts, letters, documents, and other sources, Michael Kaye shows Puccini--whose music is the mainstay of every opera house in the world--in a new light. The words and music of fifteen songs, including little-known music from the operas Edgar and La Rondine, are provided. More than a dozen fascinating--some rare--photographs give an extra dimension to the book. About the Author Michael Kaye received his M.M. in Opera from the New England Conservatory. He has served on the artistic staffs of opera companies in Boston, Chicago, Cologne, San Francisco and New York.

Upland Communities Pier Paolo Viazzo 1989-02-16 This book follows the social, economic and demographic transformations of the Alpine area from the late Middle Ages. Its aim is to reassess the image of the upland community which emerges from the work of historians, geographers and social anthropologists. The book therefore deals at length with such problems as the causes and consequences of emigration and patterns of marriage and inheritance in favouring or hampering the adjustments of local populations to changing economic or ecological circumstances, and tackles the vexed question of the relative importance of cultural and environmental factors in shaping family forms and community structures. Although its foundation lies in a long period of anthropological fieldwork conducted in an Alpine community, Upland Communities relies on the methods and conceptual tools of historical demography. Combined with a long-term historical perspective, its broad comparative approach unveils an unexpected diversity in regional and spatial demographic patterns and questions a number of deep-rooted but ultimately misleading notions concerning mountain society and its alleged backwardness in the past.

Saracen Tales Giuseppe Bonaviri 2007 Fiction. Short Stories. Translated from the Italian by Barbara De Marco. In SARACEN TALES, Italian-born Giuseppe Bonaviri brings a wild newness to the tale of the life of Jesus. In this succession of stories, Bonaviri explores all manners of the known and unknown, the archetypal, the mythological, the symbolic--the life of Jesus is both his material and his point of departure. Part surrealism, part folklore, readers will be amazed at the originality and creativity with which a long-familiar tale is presented. "Bonaviri is a myth-maker, looking simultaneously to the historical past and to the future, to arrive at the a-historical, at cosmic universality"--Franco Zangrilli. Giuseppe Bonaviri was born in 1924 in Sicily. He began writing when he was ten and continued through high school, college, and in his professional life as a doctor, health official, and cardiologist. His work has been widely translated.

Moon is everything Christine isn't. She's confident, impulsive, artistic . . . and though they both grew up in the same Chinese-American suburb, Moon is somehow unlike anyone Christine has ever known. But after Moon moves in next door, these unlikely friends are soon best friends, sharing their favorite music videos and painting their toenails when Christine's strict parents aren't around. Moon even tells Christine her deepest secret: that she has visions, sometimes, of celestial beings who speak to her from the stars. Who reassure her that earth isn't where she really belongs. Moon's visions have an all-too-earthly root, however, and soon Christine's best friend is in the hospital, fighting for her life. Can Christine be the friend Moon needs, now, when the sky is falling? Jen Wang draws on her childhood to paint a deeply personal yet wholly relatable friendship story that’s at turns joyful, heart-wrenching, and full of hope.
