*Pestilence and the Body Politic in Latin Literature* Hunter H. Gardner 2019-07-11 Scientists,

journalists, novelists, and filmmakers continue to generate narratives of contagion, stories shaped by a tradition of disease discourse that extends to early Greco-Roman literature. Lucretius, Vergil, and Ovid developed important conventions of the western plague narrative as a response to the breakdown of the Roman *res publica* in the mid-first century CE and the reconstitution of stabilized government under the Augustan Principate (31 BCE-14 CE): relying on the metaphoric relationship between the human body and the body politic, these authors used largely fictive representations of epidemic disease to address the collapse of the social order and suggest remedies for its recovery. Theorists such as Susan Sontag and René Girard have observed how the rhetoric of disease frequently signals social, psychological, or political pathologies, but their observations have rarely been applied to Latin literary practices. *Pestilence and the Body Politic in Latin Literature* explores how the origins and spread of outbreaks

described by Roman writers enact a drama in which the concerns of the individual must be weighed against those of the collective, staged in an environment signalling both reversion to a pre-historic Golden Age and the devastation characteristic of a post-apocalyptic landscape. Such innovations in Latin literature have impacted representations as diverse as Carlo Coppola's paintings of a seventeenth-century outbreak of bubonic plague in Naples and Margaret Atwood's *Maddaddam Trilogy*. Understanding why Latin writers developed these tropes for articulating contagious disease and imbuing them with meaning for the collapse of the Roman body politic allows us to clarify what more recent disease discourses mean both for their creators and for the populations they afflict in contemporary media.

*Human Work in the Age of Smart Machines* Jamie Merisotis 2020-10-06 A public policy leader addresses how artificial intelligence is transforming the future of labor—and what we can do to protect the role of workers. As

computer technology advances with dizzying speed, human workers face an ever-increasing threat of obsolescence. In *Human Work In the Age of Smart Machines*, Jamie Merisotis argues that we can—and must—rise to this challenge by preparing to work alongside smart machines doing that which only humans can: thinking critically, reasoning ethically, interacting interpersonally, and serving others with empathy. The president and CEO of Lumina Foundation, Merisotis offers a roadmap for the large-scale, radical changes we must make in order to find abundant and meaningful work for ourselves in the 21st century. His vision centers on developing our unique capabilities as humans through learning opportunities that deliver fair results and offer a broad range of credentials. By challenging long-held assumptions and expanding our concept of work, Merisotis argues that we can harness the population's potential, encourage a deeper sense of community, and erase a centuries-long system of inequality.

**Dressing for Altitude** Dennis R. Jenkins 2012-08-27 "Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human

endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

**Health Literacy** Who Regional Office for Europe

2013 As societies grow more complex and people are increasingly bombarded with health information and misinformation, health literacy becomes essential. People with strong health literacy skills enjoy better health and well-being, while those with weaker skills tend to engage in riskier behavior and have poorer health. With evidence from the recent European Health Literacy Survey, this report identifies practical and effective ways public health and other sector authorities and advocates can strengthen health literacy in a variety of settings, including educational settings, workplaces, marketplaces, health systems, new and traditional media and political arenas. The report can be used as a tool for spreading awareness, stimulating debate and research and, above all, for informing policy development and action.

The general information section deals with the types of test products and services that are available (occupation-specific tests, item banks, cognitive tests, performance tests, affective measures, and scoring services), access options (purchase, cost recovery, exchange, consortium membership, testing services, and restrictions), criteria for selecting tests (validity, reliability, criterion-referenced format, appropriateness, currency,

local relevance, and convenience and usefulness for local purposes), and procedures for obtaining information (contained in computer databases and print-based resources) about products that are not included in the guide. Specific information is presented in the form of source abstracts describing currently available products and services and an occupation index that cross-references test titles and sources. (MN)

**Leica Lens Compendium** Erwin Puts 2001 8 1/2 x 10 Since publication this title has proved to be very popular for both the serious lens user wishing to understand more about his lenses, as well as the Leica enthusiast considering which lens would be suitable to add to his outfit. Do you know your "Coma from your Aberrations"? If "Yes," then part 2 of Erwin Puts' new book will be of considerable interest to you. Either way you may find this section easier to understand than you expect; the illustrations and diagrams do help. Part 1 goes into the optical history of E. Leitz, Wetzlar and the Leica Camera of Solms in

detail with all the personalities involved. This section is well illustrated with some new pictures. The commercial demands are always battling with the perfectionists at Leica who created some of the world's most famous lenses. Part 2 is an optical digression explaining the lens and glass design features, problems and terms and the continual battle to ensure that Leica users end up with the highest possible standard of lens. Part 3 is the largest part of the book. Puts has tested Leica lenses from 1925 to date; each lens, in most cases with diagram, is detailed with its performances at the critical apertures.
